Senior Product Designer with 10 years of experience, specialising in complex B2B SaaS platforms. I deliver immediate impact in ambiguous environments, whether shaping products from zero or bringing structure to fast-scaling systems.

## EXPERIENCE

---

### Product Designer (Contract) | Martin Brower

Jun-Dec '25 · London

*One of the world's largest supply chain companies serving global restaurant brands.*

**Enterprise Platform Design:** Designed a data-driven platform for large-scale restaurant operations to manage waste, recycling, and resource recovery workflows. Enabling cost savings and revenue opportunities through improved visibility into waste streams.

**User Research / Iteration:** Drove usability testing across UK/CA/FR markets, uncovering workflows of multi user groups, and translating findings into design iterations that improved usability.

**Cross-Team Collaboration:** Partnered with PM, engineers, and business teams to align user stories, balance business needs with technical feasibility, adapt designs for Power BI and Mobile app integration.

### Founding Product Designer | RemarkAI

Sep '22-May '25 · London

*AI-powered video analytics SaaS startup, serving enterprise clients in logistics and security sectors.*

**Core Product Leadership:** Led UX/UI design of an AI-powered B2B platform, translating complex computer vision models into usable tools for global security teams.

**Enterprise Feature Development:** Designed role-based access control, AI training tools, and dynamic dashboards, strengthening user trust and supporting \$6M+ in enterprise contracts.

**Design System / Efficiency:** Built a scalable design system (templates, hand-offs, reusable patterns), reducing sprint cycles and enabling faster delivery of enterprise features.

### UXUI Designer | University of the Arts London

Feb-Jul '22 · London

*World's top-ranked art and design university, with 8 colleges and tens of thousands of students globally.*

**Data-Driven Redesign:** Led usability testing and focus groups to uncover high bounce rate drivers. Proposed design mission "First bridge for global design talent," guiding a complete website redesign.

**Design System Revamp:** Updated design system from principles to foundational components, integrating accessibility standards for improved inclusivity.

8-person AI startup focused on smart image recognition for the auto insurance industry.

**MVP to Market:** Led end-to-end design for award-winning "AI Insurance Camera", achieved 1,000+ seed users within first month of launch.

**Service Design:** Created service blueprints and co-design workshops mapping journeys across insurers, repair shops, and drivers, aligning product features with real industry workflows.

One of the Largest search engine and tech company.

**Data-Driven Design:** Increased average content consumption per session by 20% and session duration by 13% through user research and data analytics.

**Design-Driven Business:** Promoted to Senior UX Designer; led ad efficiency project contributing to Baidu's third place in China's 2017 ad revenue rankings.

**Team Development:** Mentored junior designer and coached interns, fostering career growth and strengthening team capabilities.
